W. D. "BILL" HUNTER
GENERAL MANAGER

The establishment of the World Hockey Association fills a very definite need in the sports world. For years, hockey has stood alone as the only major "Sport" without two big leagues in North America.

Today a real "Air of Excitement" has been established amongst Players, Officials and Management of the World's fastest and most exciting Sport. New Horizons of opportunity have been unveiled with the birth of the World Hockey Association. The opportunities to play and work in a new and exciting Major League has stimulated the thinking of every Player, Official, and Management. "At last it's arrived" - is a common expression heard throughout America's sporting world.

World Hockey will provide the fan with the fastest, most aggressive and exciting action. A League Player Formula was established to assure parity which guarantees a highly competitive league. Certainly this new concept in Major League structuring will provide unlimited opportunities for Players and Officials from all levels of the game. You will see an excellent mixture of player talent from the existing major and minor professional leagues, as well as the "cream" of future stars from the top Amateur Leagues. Some of hockey's most able and experienced sports executives have worked many hours to create not only the formula, but to sign the necessary players throughout North America to assure the fans of a highly entertaining and competitive brand of hockey. You will be watching Major League Hockey at its best with top officials working in every game.

The World Hockey Association is one of the finest new leagues ever to be created in any major sport.

North, South, East and West, arenas will be jammed and cheering as the referees drop the puck to start the action for the 1972-73 season.

We are confident the World Hockey Association will be the biggest development in the last 50 years of Sports.
